Projects

Home Server

June 2025

- Converted an old laptop into a secure multipurpose Linux server for cybersecurity experimentation and self-hosting services.
- Secured the server using SSH hardening, firewall configuration (UFW) and fail2ban.
- Set up and managed Docker containers for services such as photo backups, system monitoring and reverse proxying.

Portfolio Website

May 2025

- Designed and developed a static personal portfolio website using HTML, CSS and JavaScript to showcase my projects, skills and experience.
- Deployed the site via Cloudflare Pages with GitHub for version control and continuous deployment.
- Implemented a clean, responsive and user-friendly UI featuring sections for project descriptions and code repositories, blog posts, an about page and contact information.
